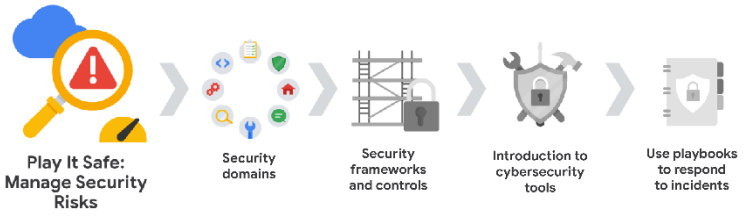
Course 2 content

Each course of this certificate program is broken into modules. You can complete courses at your own pace, but the module breakdowns are designed to help you finish the entire Google Cybersecurity Certificate in about six months.

What's to come? Here's a quick overview of the skills you'll learn in each module of this course.

Module 1: Security domains



You will gain understanding of the CISSP's eight security domains. Then, you'll learn about primary threats, risks, and vulnerabilities to business operations. In addition, you'll explore the National Institute of Standards and Technology's (NIST) Risk Management Framework and the steps of risk management.
