Assessment of Exemplar

Compare the exemplar to your completed incident report analysis and incident report. Review your work using each of the criteria in the exemplar. What did you do well? Where can you improve? Use your answers to these questions to guide you as you continue to progress through the program.

Note: *The exemplar represents one example of how to complete the activity. Yours may differ in certain ways. What's important is that you have an idea of what your incident analysis should resemble.*

The exemplar is accompanied by the activity, and presents a complete incident report analysis to establish:

- What type of attack occurred, the scope of the incident, and its impact to the organization

- Potential network vulnerabilities and protection measures
- Detection tools to monitor and secure the network
- How to respond to cybersecurity incidents in the future
- Recovery plans to restore normal operations
